

AI document validation for energy subsidy operators.

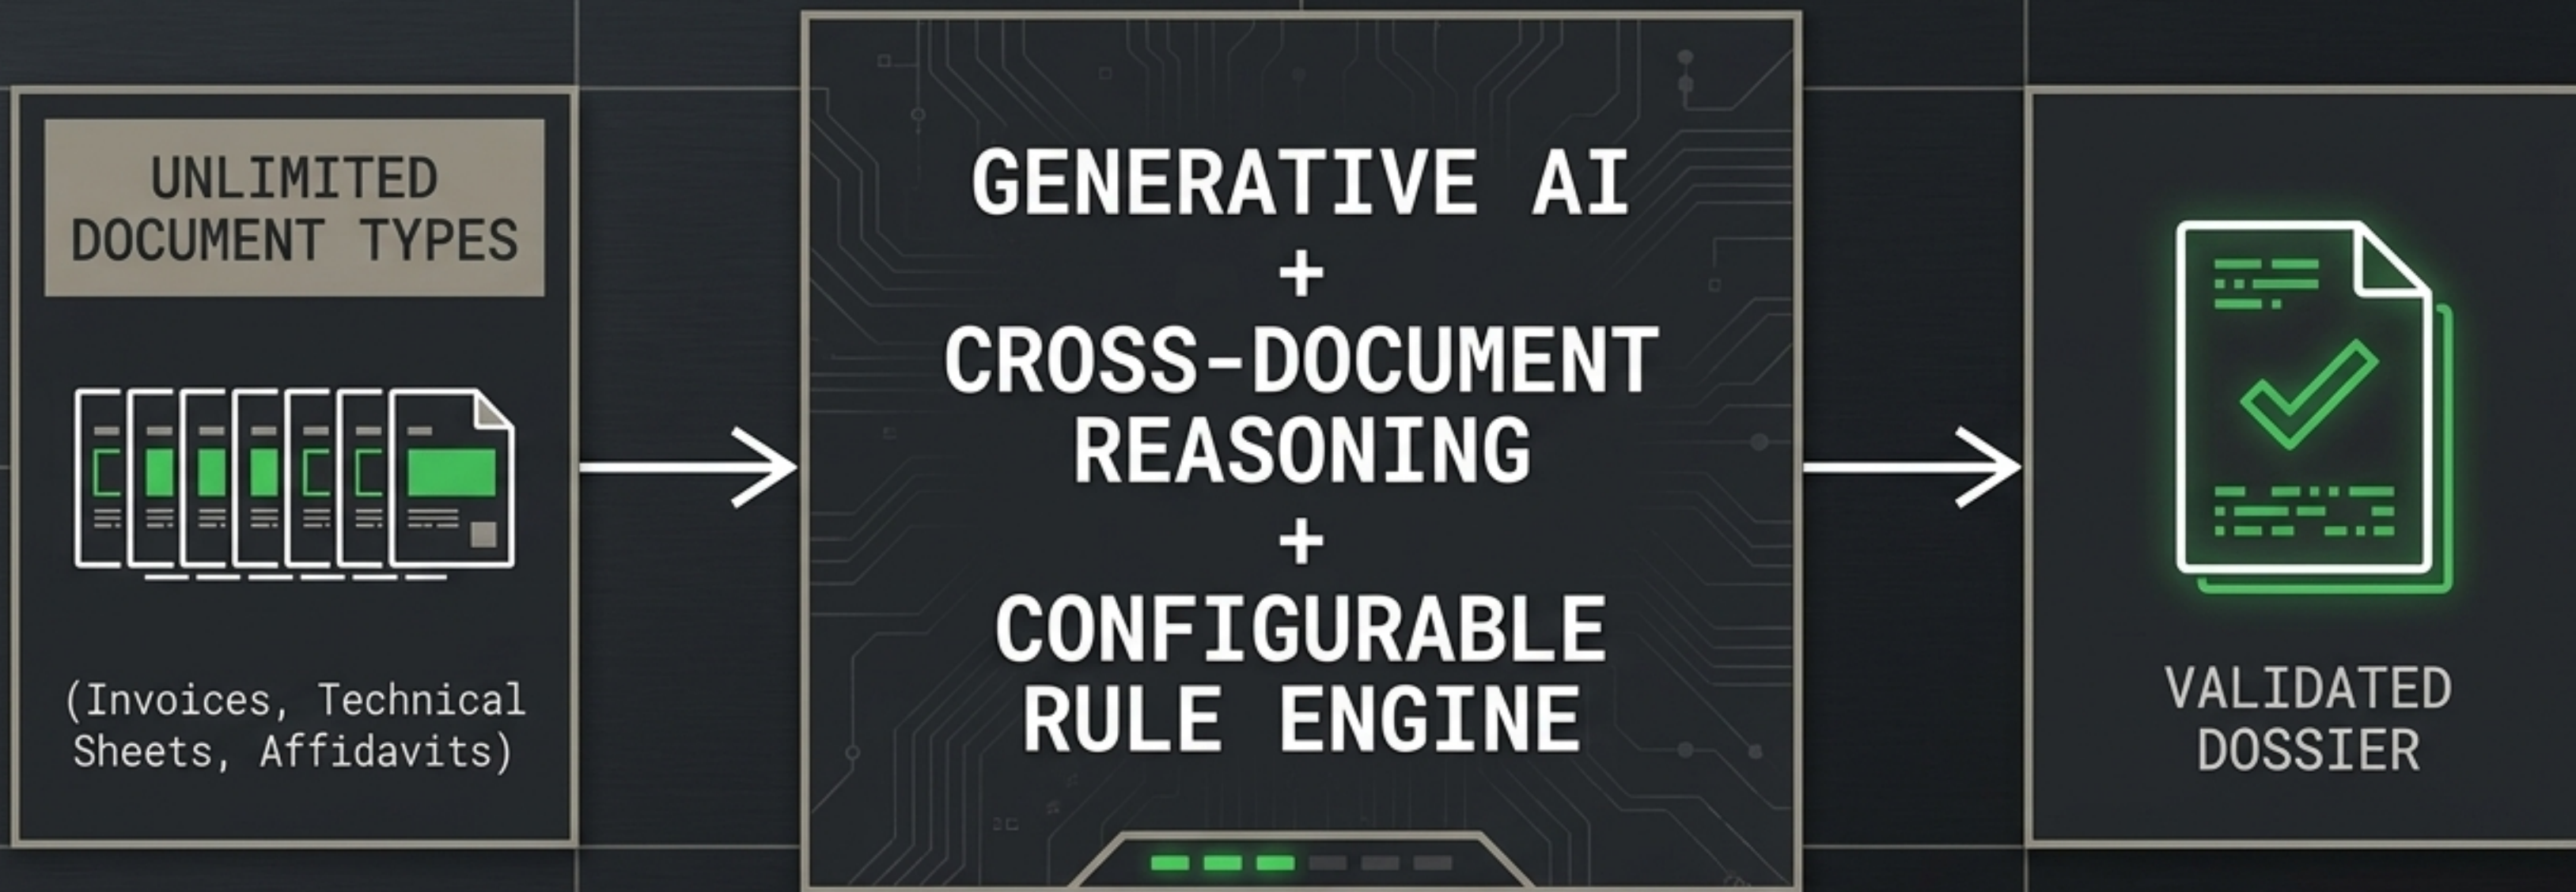

Cross-check every field, every document, and every programme rule before submission.

SYS.INIT: [2026.06.03 08:14:02] | STATUS: SECURE

THE VALIDATION ENGINE

<30 seconds per full dossier processing.

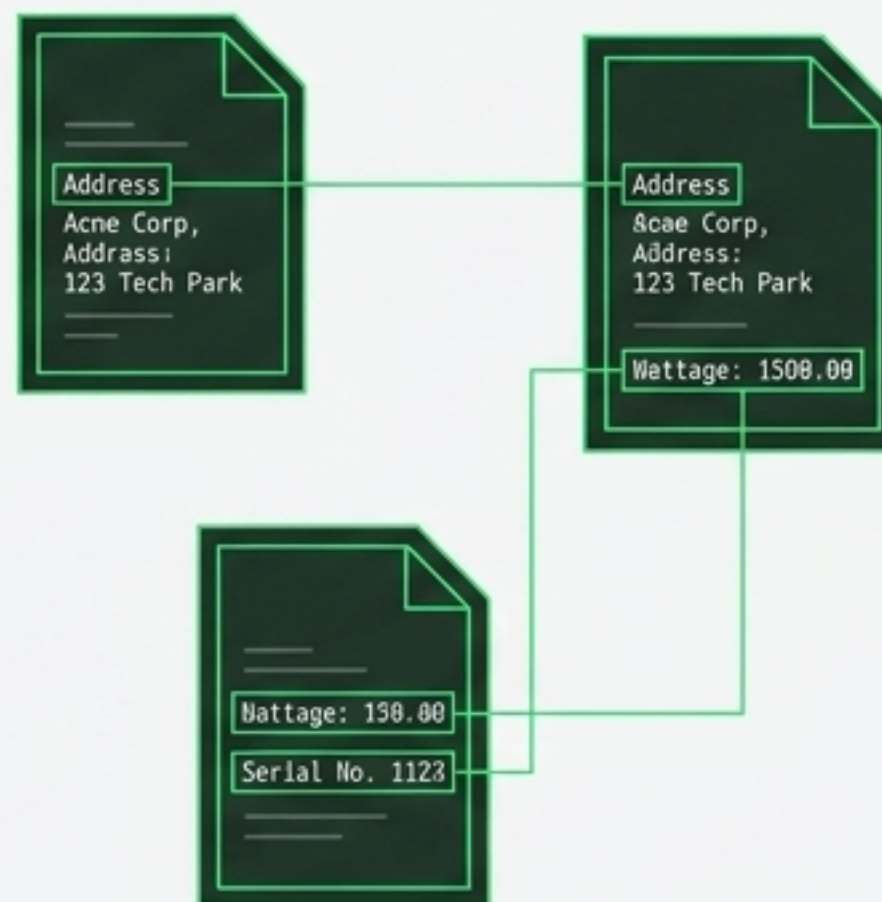

100% timestamped audit trail generation.

Generative AI Extraction

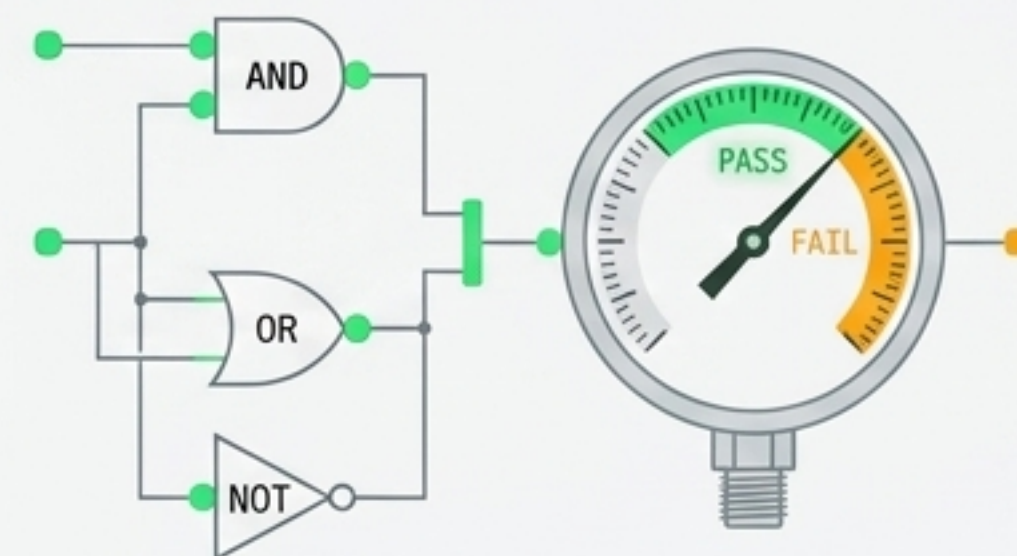

Turns unstructured attestations and certificates into rigid, queryable data.

Cross-Document Reasoning

AI that doesn't just read isolated pages, but checks for logical consistency across the entire dossier.

Programmable Rule Engine

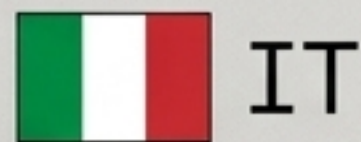

The logic core that automatically verifies extracted data against the specific thresholds of the selected regulatory programme.
