

iverif.io

AI document validation for
energy subsidy operators.

Stop losing subsidy claims to avoidable document errors.

MANUAL BOTTLENECKS

DIAGNOSTIC READOUT

THE LOAD

OPERATORS MANUALLY CROSS-CHECK 10-20 DISTINCT DOCUMENTS (INVOICES, ATTESTATIONS, TECHNICAL SHEETS) PER DOSSIER.

THE RISK

REJECTIONS ARE FREQUENTLY DISCOVERED ONLY POST-SUBMISSION, MAKING CORRECTIONS INCREDIBLY EXPENSIVE AND DELAYING REVENUE.

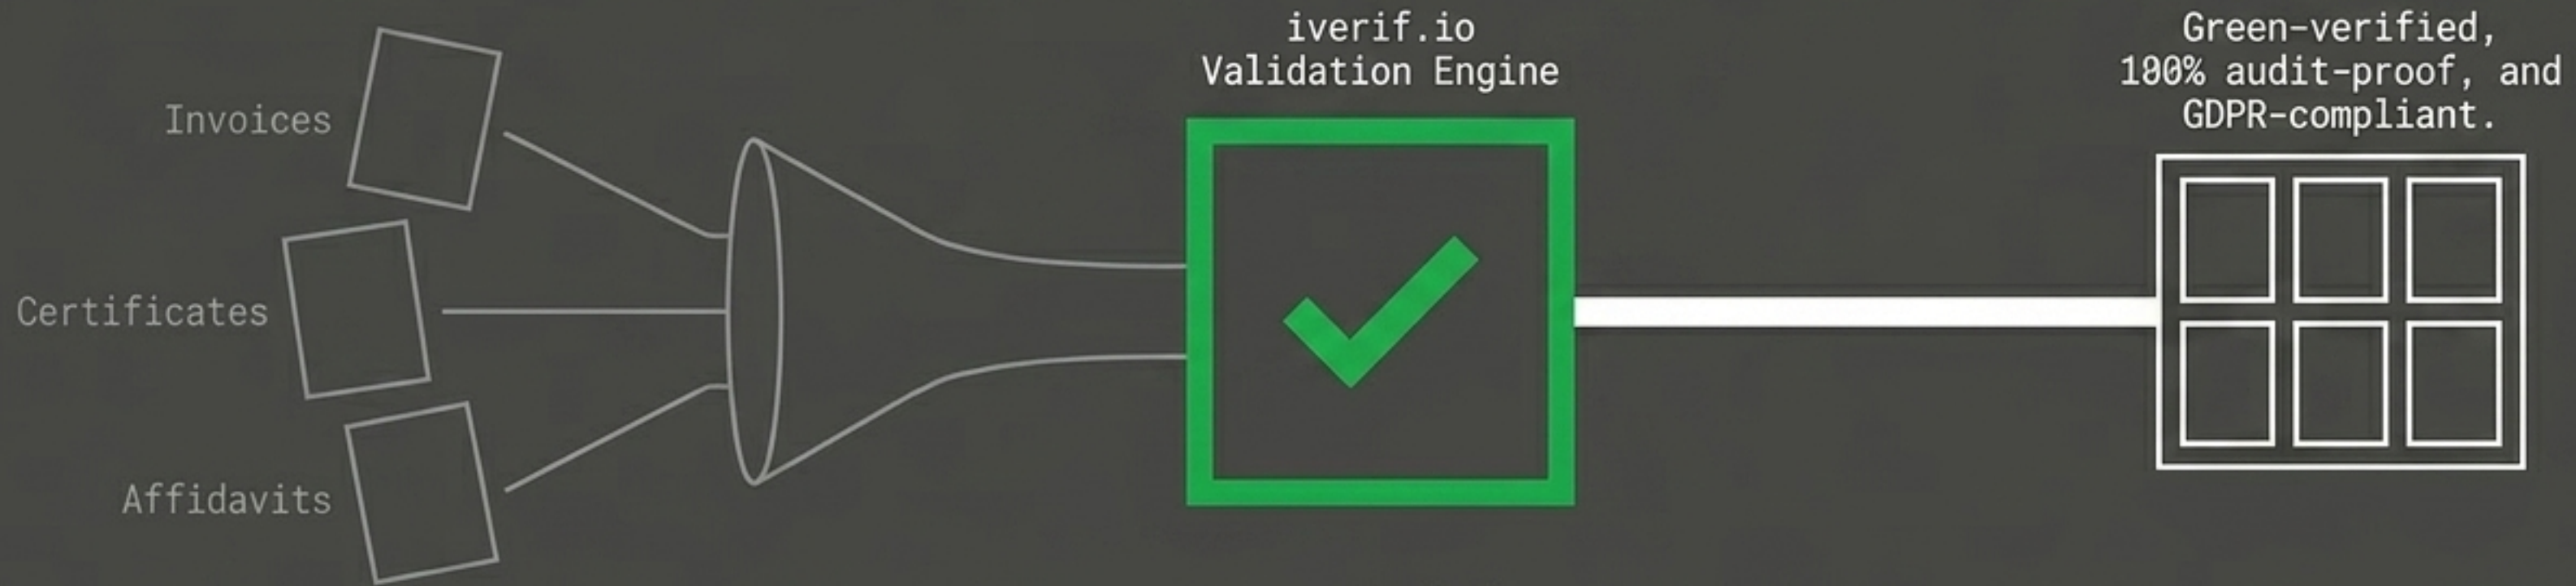

THE COMPLEXITY

UNIQUE EU PROGRAMME RULES CHANGE FREQUENTLY, AND MANUAL REVIEWS LEAVE ZERO AUDIT TRAILS WHEN REGULATORS QUESTION THE DOSSIERS.

TIME: [CURRENT_DATE_TIME]

The only AI validation platform built specifically for EU energy subsidy operators.

Dossier Pipeline

30 seconds

to validate a full dossier.

<2%

dossier rejection rate target.

TIME: [CURRENT_DATE_TIME]

SYSTEM_ACCESS_PROFILE

● ACTIVE

Identity

The Compliance Operator

ROLES

Back-office Managers, Subsidy Coordinators at ESCos, Operations Directors.

PRIMARY GOAL: Scale submission volume efficiently without requiring proportional team growth.

Psychographics

MOTIVATIONAL_DRIVERS

Regulatory Peace of Mind

Never lose a subsidy claim to avoidable errors again.

Operational Pride

Validate dossiers with the exact technical precision their work deserves.

Cross-Document Reasoning

Generative AI extracts structured data and automatically checks for consistency across every document in the dossier.

Pre-Configured Rule Engine

Out-of-the-box readiness for 6 major EU subsidy programmes.

Managed Onboarding

A dedicated team of experts configures your specific rules. Go-live in 5-7 days, not months.

100% Audit Trail

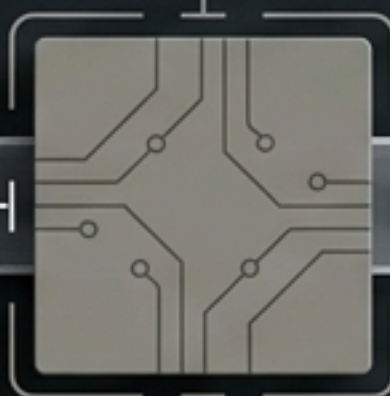

Complete timestamped logs of every validation check. EU-hosted infrastructure ensuring strict GDPR compliance.

	CROSS-DOCUMENT REASONING	PRE-CONFIGURED EU RULES	ONBOARDING SPEED	VALIDATION LOGIC
iverif.io				
Generic OCR Tools	Fails	Zero	Self-serve	
Legacy DMS (SharePoint)	No extraction	Zero	Months	
Single-Market CEE Tools	Basic	France Only	Fast	Rigid

Phase 1: Frictionless Adoption (Setup)

DATA FLOW
INPUT

DATA FLOW
INPUT

Managed onboarding executed in days. Completely breaks the primary buyer objection of "implementation complexity" common to enterprise SaaS.

Phase 2: Volume Scaling (Processing)

SCALABILITY
ENGINE ACTIVE

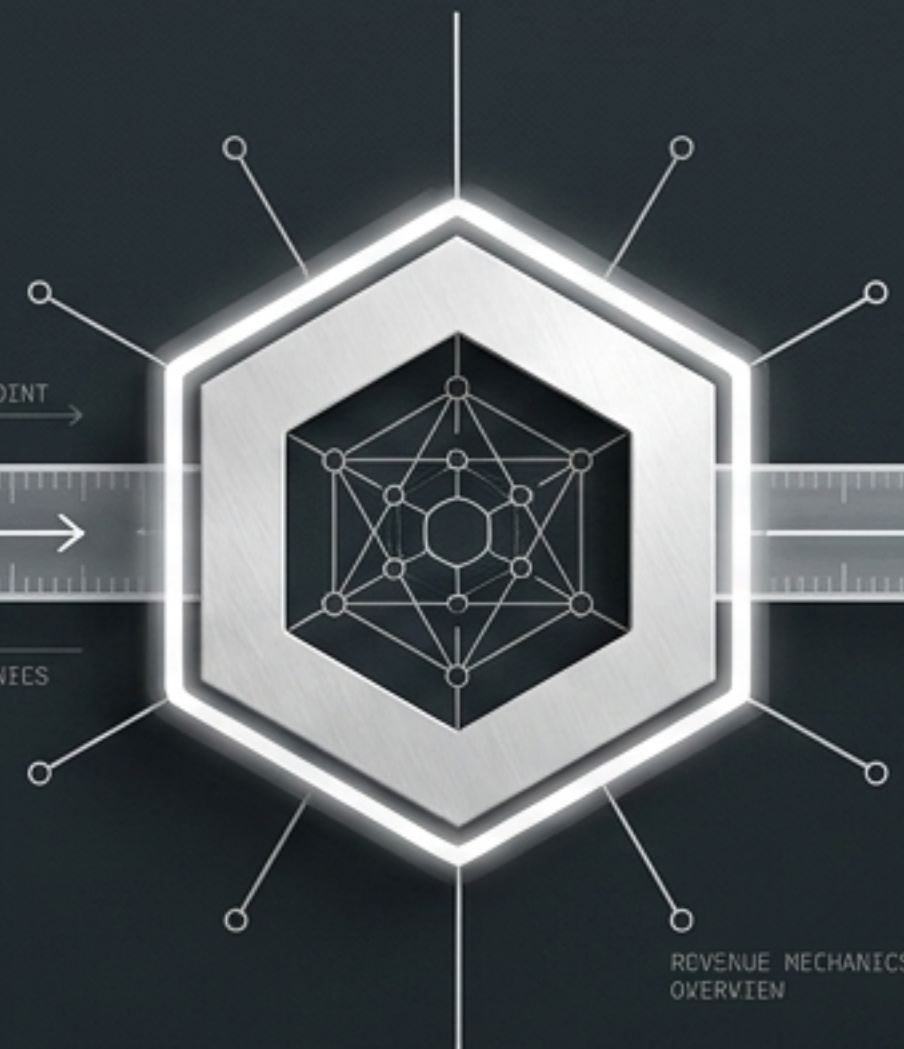

Once deployed, the platform automatically scales recurring processing capability in tandem with the operator's submission volume via API.

Phase 3: Ecosystem Integration

EXTERNAL
INTERACTION POINT

REVENUE MECHANICS
OVERVIEW

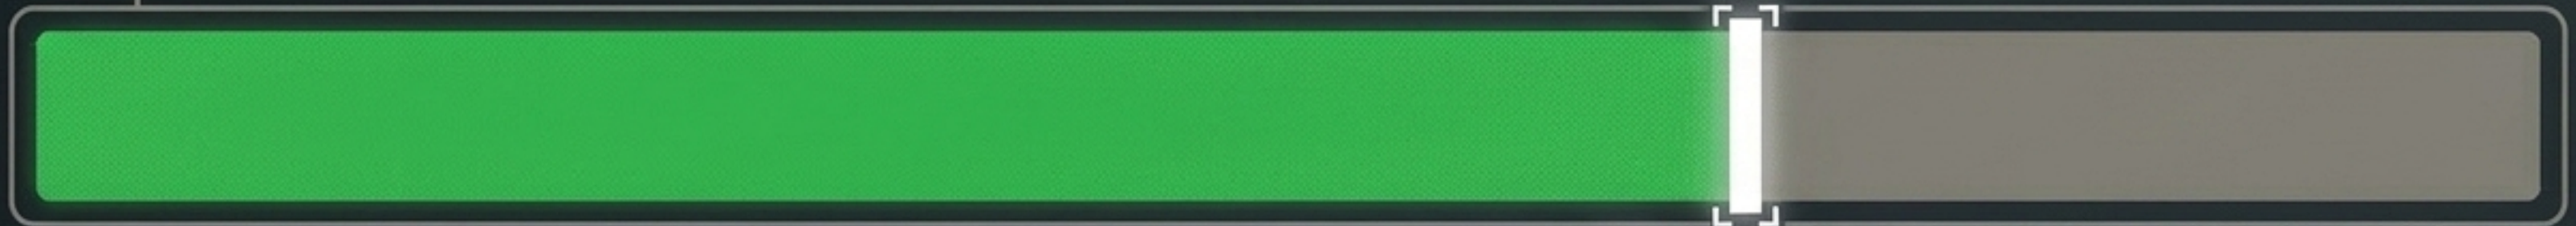

White-label ready architecture built for seamless embedding directly into enterprise CRMs.

TIME: [CURRENT_DATE_TIME]

LIVE PROGRAMME COVERAGE

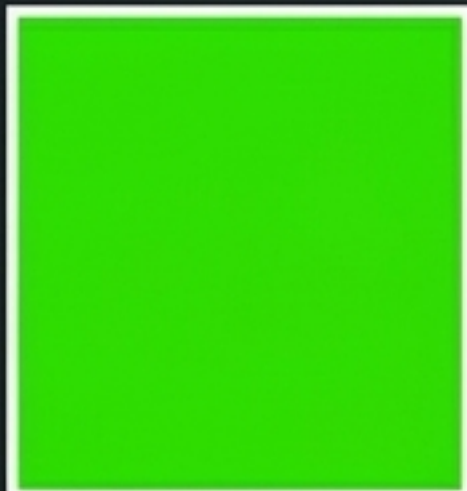

The system is pre-configured and live for:
CEE (France), Conto Termico (Italy),
BEG (Germany), ECO4 (UK), Primes Énergie,
and MOVES III (Spain).

CURRENT_STATE

NEXT PHASES ROADMAP

Expansion of custom configuration
capabilities for localized operators, and
broadening the platform's EU regulatory
footprint for pan-European aggregators.

Aa

Geist Sans & Mono.
Clean, functional,
zero visual noise.

VISUAL METAPHOR

Signal in the System —
A high-precision instrument
panel where every threshold
is visible and every action is
traceable.

ARCHETYPE

The Architect.
Precision meets regulatory
authority.

VOICE & TONE

Precise, authoritative, quietly
confident. Technical depth
delivered with absolute clarity.
No hype — just proven results.

Reclaim your regulatory peace of mind.
Initiate managed onboarding protocol today.
