

Stop losing subsidy claims to avoidable document errors.

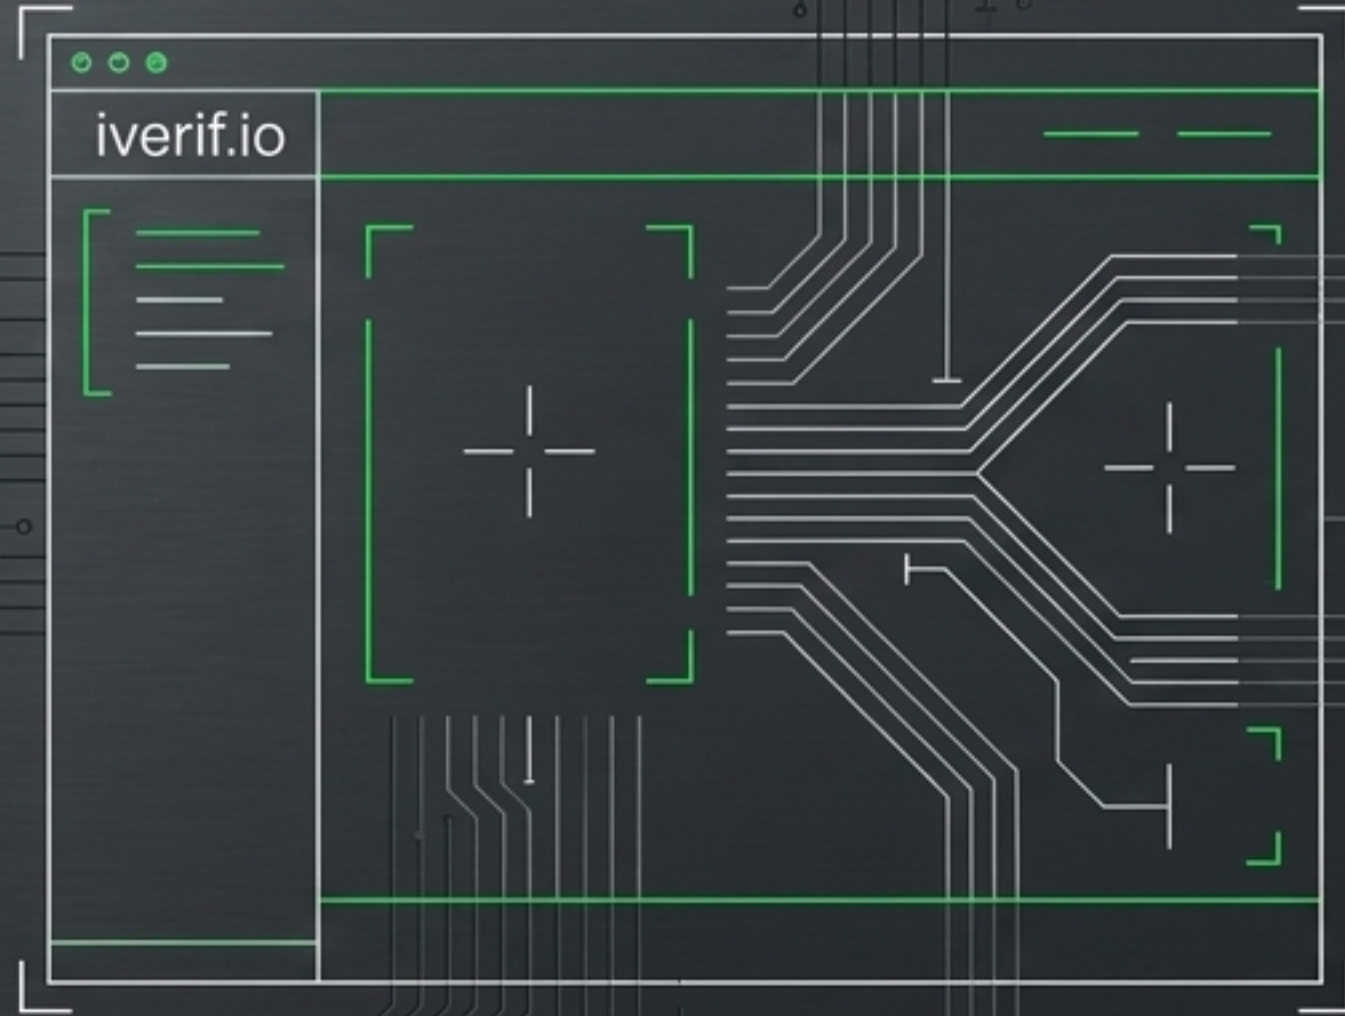

The only AI validation platform built specifically for EU energy subsidy operators, with pre-configured programme rules and managed onboarding.

The manual validation bottleneck

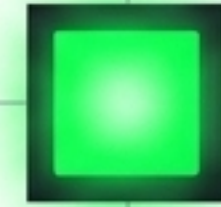

Legacy processes leave revenue exposed to regulatory complexity and human error.

AI validation engineered for EU energy subsidies.

Speed: 30 seconds
per full dossier

Accuracy: <2%
rejection rate target

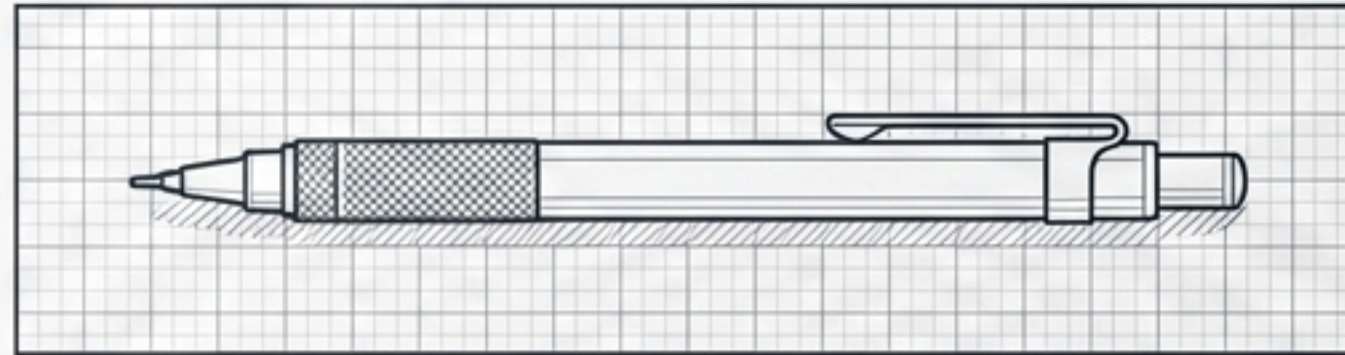

Compliance: 100%
immutable audit-trail
coverage

Cross-check every field, every document, every programme rule before submission.

Built for the compliance operator.

Operator Profile

[ACCESS LEVEL]: Back-office Managers / ESCos / Aggregators / Retrofit Coordinators.

[PRIMARY MOTIVE]: Maintain regulatory peace of mind.

[OPERATIONAL DIRECTIVE]: Validate dossiers with the precision the work deserves.

[SCALABILITY]: Increase submission volume without proportional team growth.

Platform capabilities.

Generative AI Engine.

Structured data extraction & cross-document reasoning.
Eliminates manual data entry.

Configurable Rule Engine.

Unlimited document ingestion (invoices, attestations, affidavits, installation certificates).

Infrastructure Security.

100% EU-hosted. Fully GDPR compliant. Enterprise API ready for CRM integration.

Immutable Audit Log.

Timestamped validation logs for regulatory bodies. Indisputable proof of compliance.

The only purpose-built solution.

	Generic OCR	Legacy DMS	Single-Market	iverif.io
Cross-Document Validation	[No]	[No]	[Yes]	✓
Pre-Configured Programme Rules	[No]	[No]	[No]	✓
Multi-Country Scalability	[Yes]	[Yes]	[No (France Only)]	✓
AI Extraction Logic	[Yes]	[No]	[No]	✓

Generic tools cannot handle cross-document consistency. We built the missing infrastructure.

Managed onboarding. Immediate ROI.

Legacy SaaS Setup (Months)

Go-live in 5-7 days.

GO-LIVE

We don't just hand you software. A dedicated team of regulatory experts configures your specific programme rules.

Reduce headcount allocation to manual checks. Reinvest time into scaling claim volume.

Pan-European coverage from day one.

[UK]: EC04

[DE]: BEG

[FR]: CEE (Primes Énergie)

[IT]: Conto Termico

[ES]: MOVES III

Next Phases:
Custom configurations for
emerging national subsidies.
Expanded API integrations for
enterprise CRM suites.

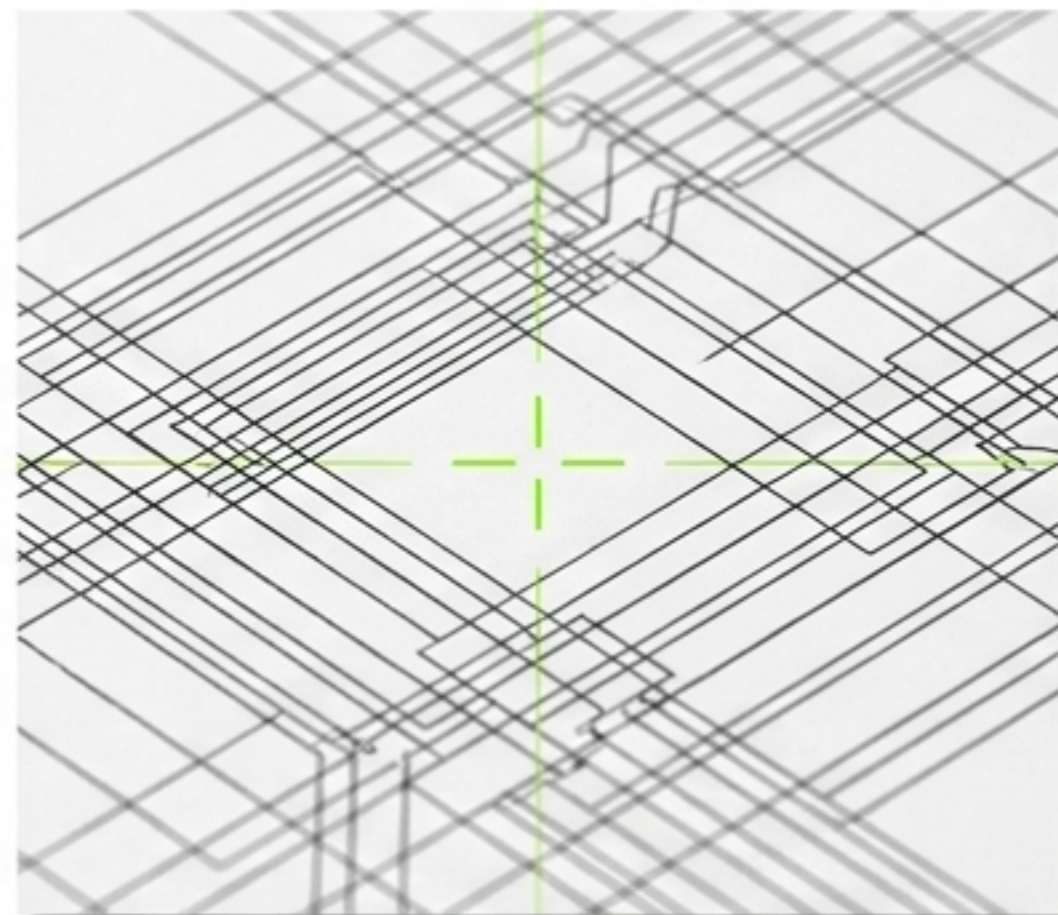

Visualizing precision.

The Archetype: The Architect.
Precise, authoritative, quietly confident.

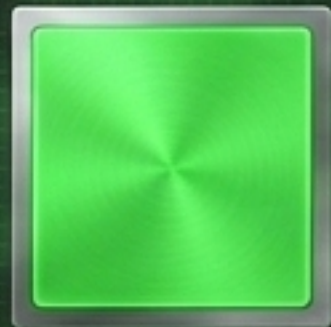

The Metaphor: A high-precision instrument panel—every signal clear, every threshold visible, every action traceable.

The Ethos: No hype. Just proven results. Technical depth delivered with clarity.

Secure your subsidy workflows today.

Experience technical depth delivered with clarity.
