

# AI document validation for energy subsidy operators.

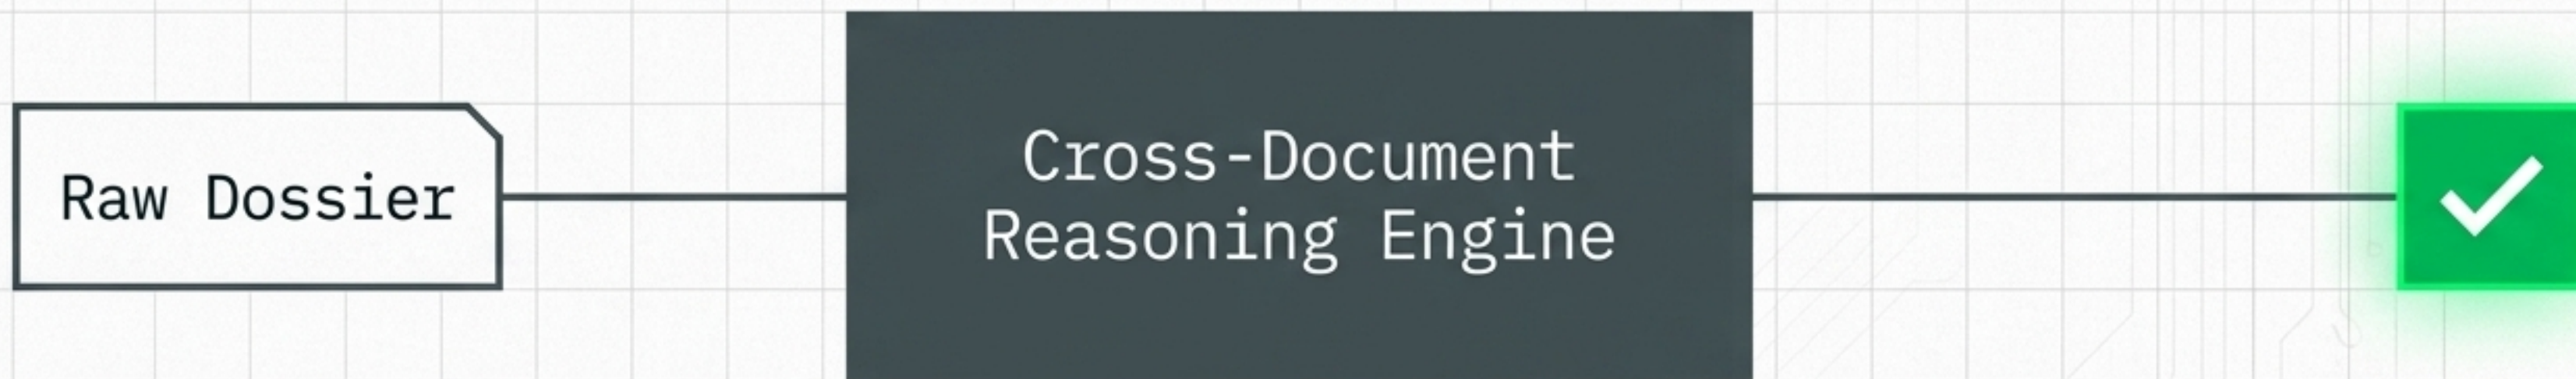

Cross-check every field, every document, every programme rule before submission.

# The high cost of manual validation.

Manual review cannot scale against shifting EU regulations. Errors hidden across multi-document dossiers are only discovered after submission, exactly when corrections are the most expensive.

# The precision instrument for regulatory compliance.

Speed:

**30 seconds**  
**per full dossier**

Target:

**<2%**  
**rejection rate**

Coverage:

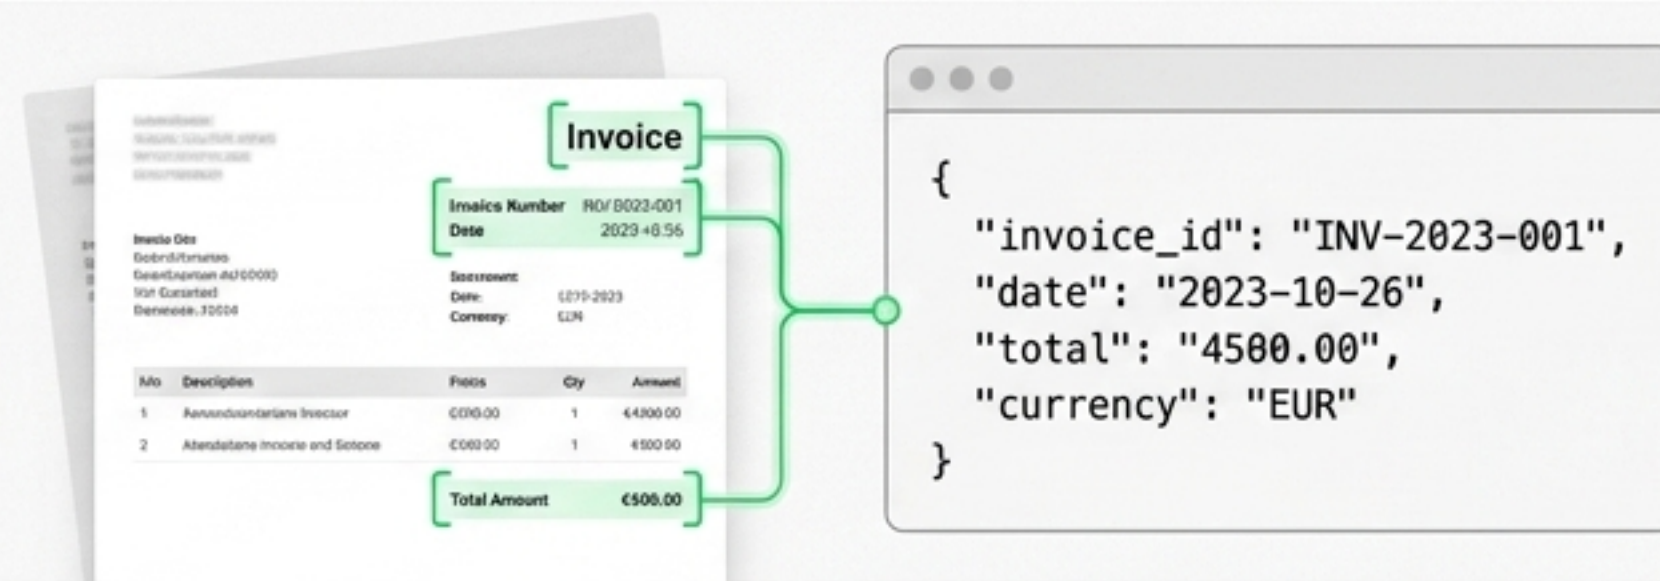

**100%**  
**audit-trail**

Enterprise-grade infrastructure. EU-hosted and fully GDPR compliant.

# Engineered for dossier perfection.

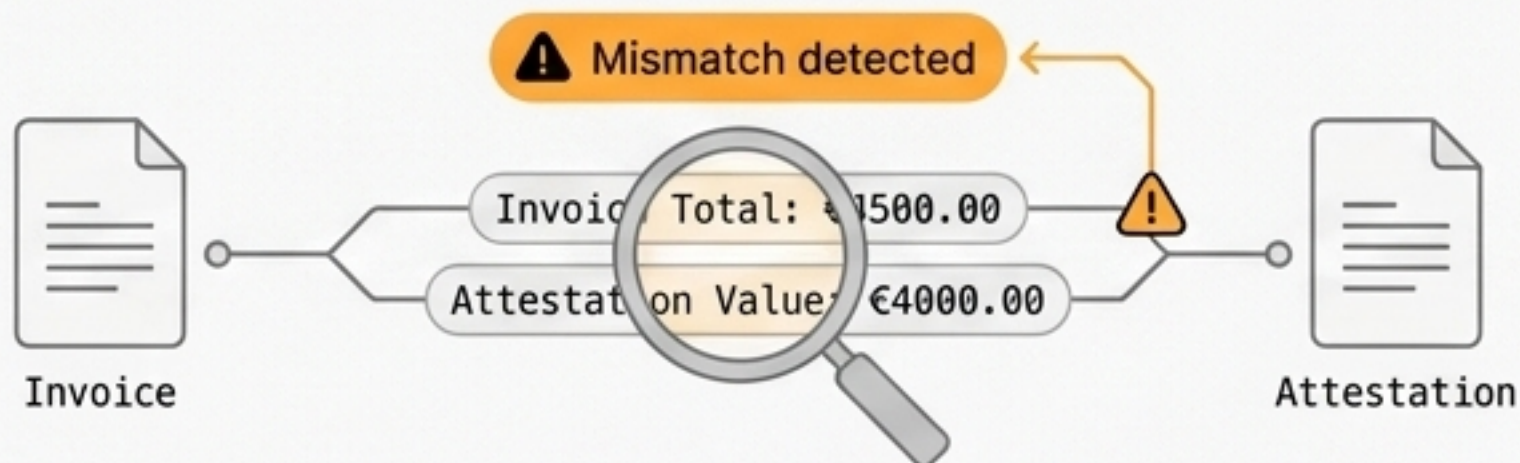

## Generative AI Extraction

Automatically structures data from unlimited document types—including invoices, attestations, technical sheets, and affidavits.

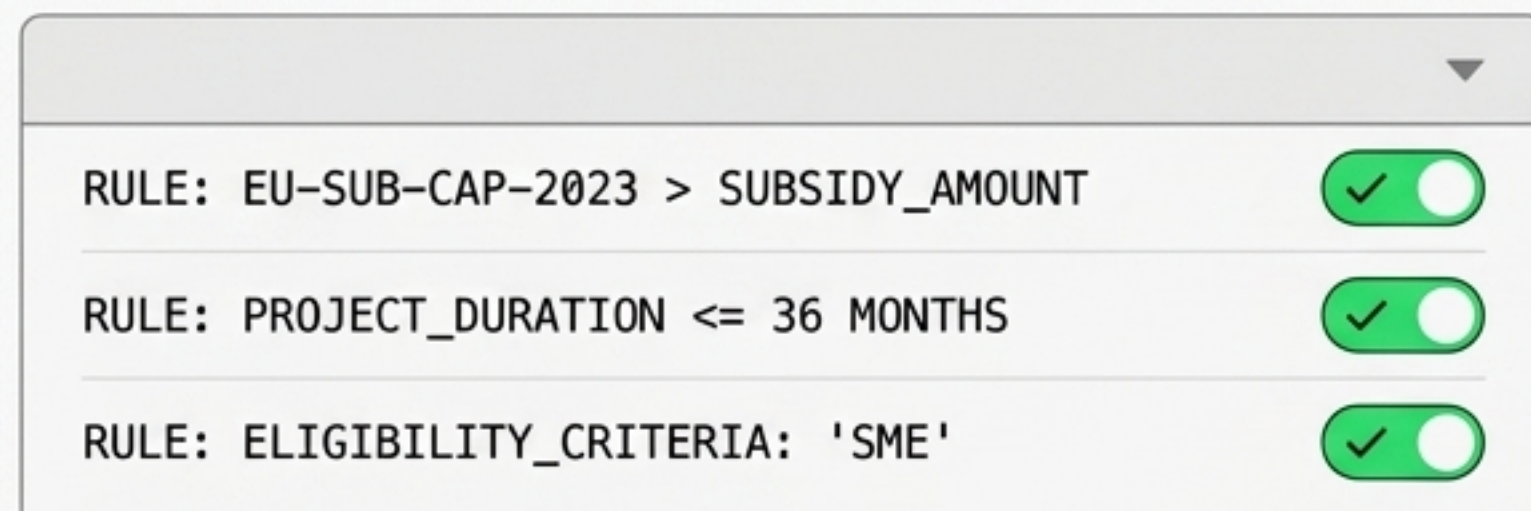

## Cross-Document Reasoning

AI designed to catch the subtle, inter-document inconsistencies that manual reviews routinely miss.

## Configurable Rule Engine

Granular validation logic built specifically for the nuances of EU energy subsidies.

# Out-of-the-box readiness for EU markets.

Pre-configured reasoning engines deployed for immediate use.

# The new equation for operational scale.

Time (30s vs hours) + Accuracy (<2% rejection) = Scalability

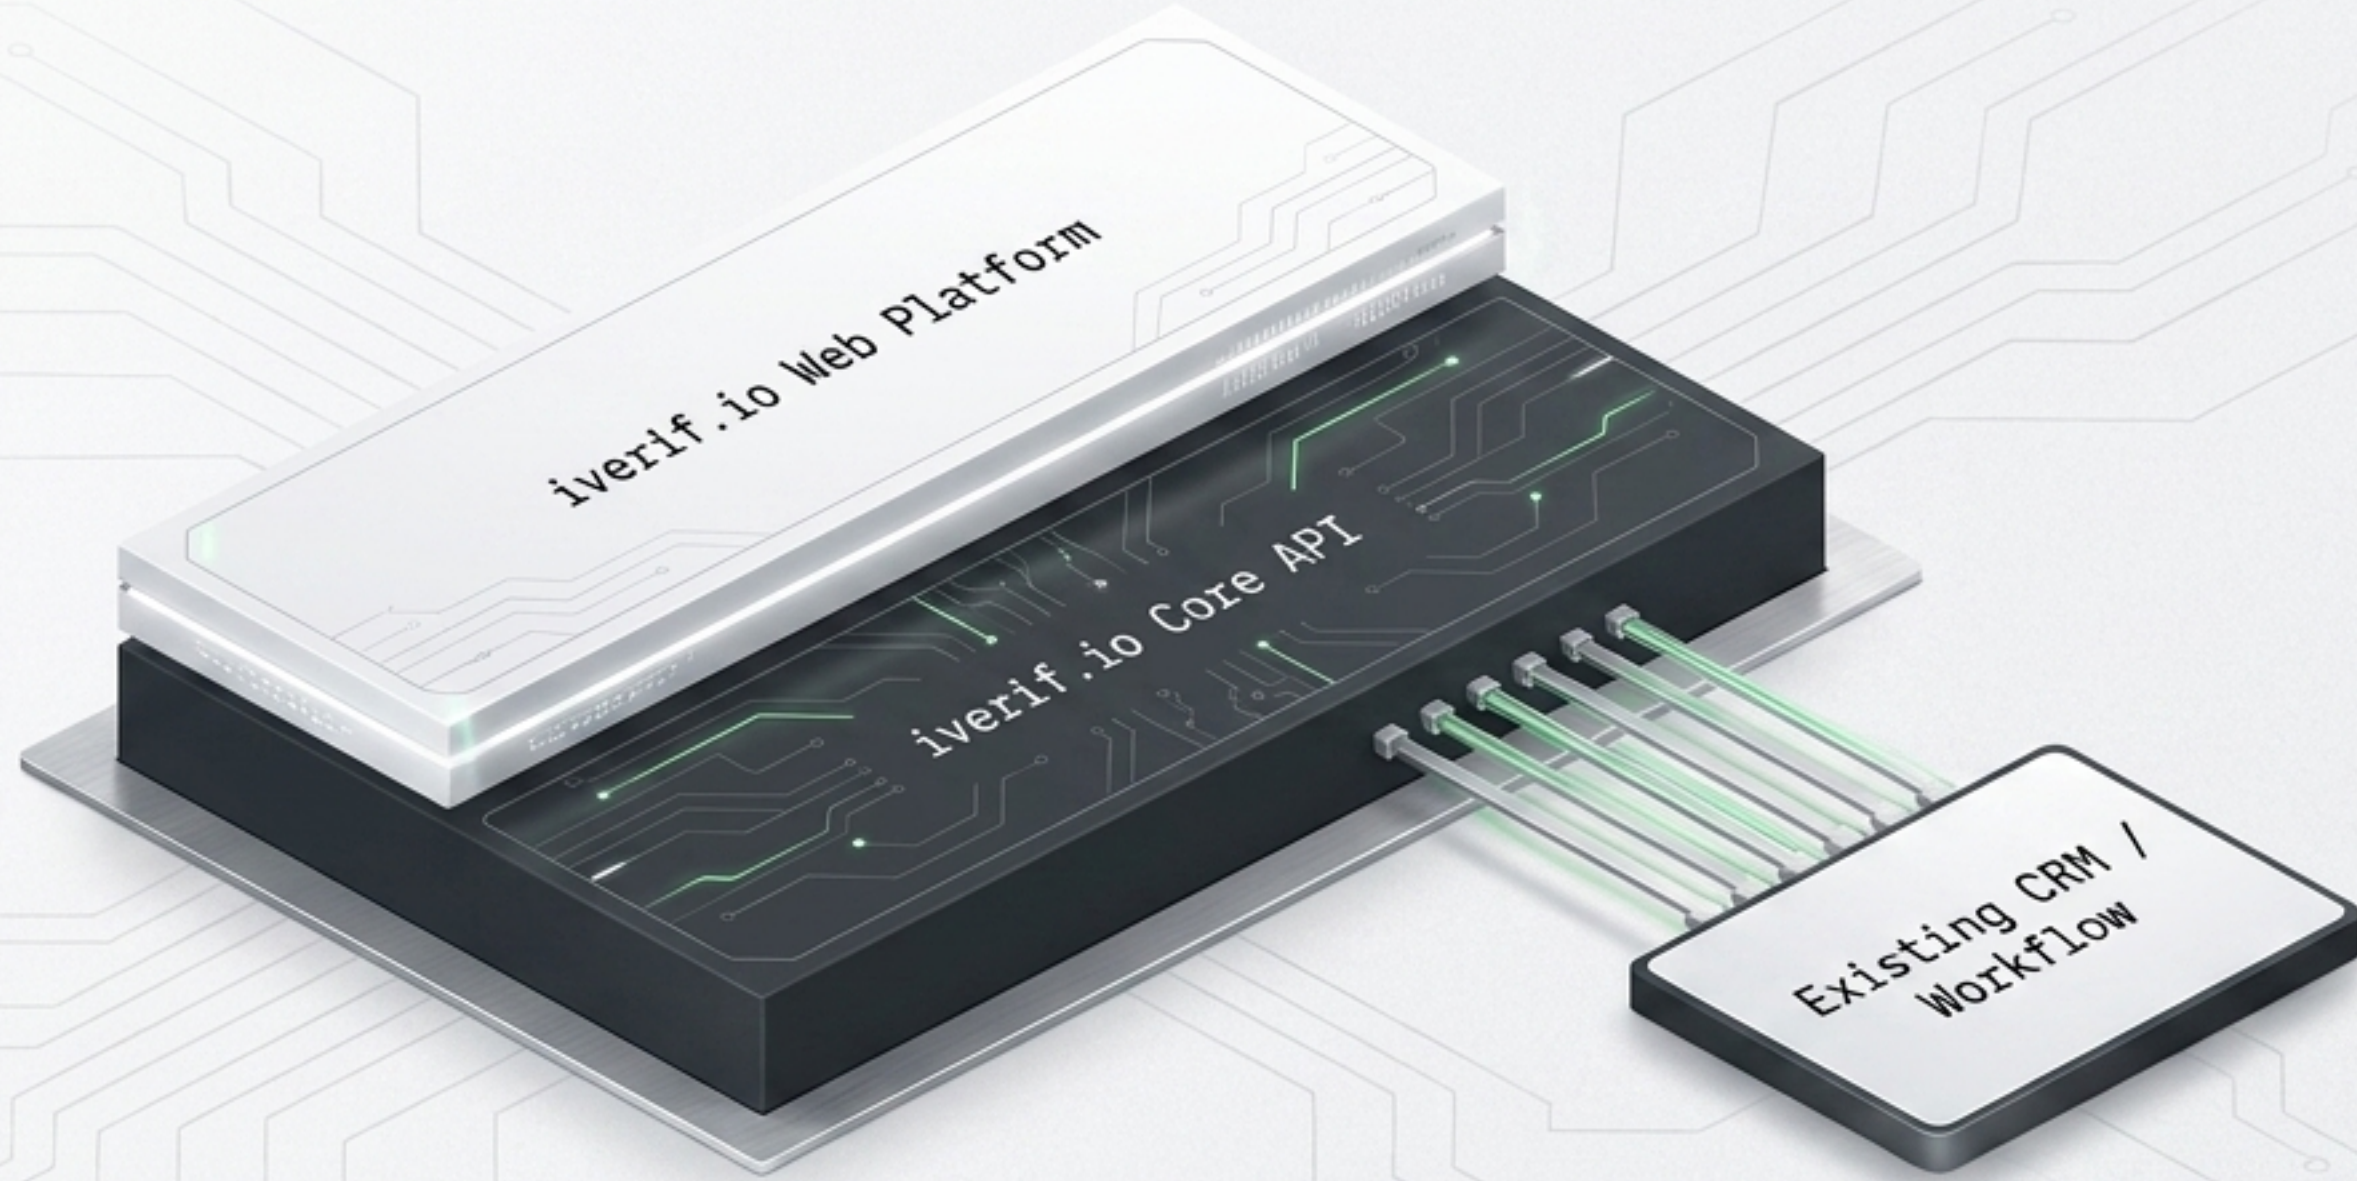

Grow your submission volume without a proportional increase in headcount.  
Never lose a subsidy claim to an avoidable data mismatch again.

# Regulatory peace of mind.

Every validation check is backed by a 100% timestamped audit trail. When regulators question a dossier, you have an immediate, immutable defense. Total system intelligence, fully explainable.

# Built for your workflow.

## Web Platform

Immediate access for compliance teams. White-label ready for large-scale operators and aggregators.

## Full API

Deep integration into your existing CRM and custom workflows for zero-friction processing.

# Go-live in 5-7 days.

Skip the months of self-serve configuration. With our Managed Onboarding, a dedicated team of regulatory experts configures your exact programme rules for you.

Bring precision to your process today.
